

where said analyzing means determines that analog recording is released by paying an additional fee, a case where said analyzing means determines that analog recording is allowed, but digital recording is not allowed and a case where said analyzing means determines that neither analog recording nor digital recording is allowed, said display control means controls the display on the screen to make the user recognize the respective cases.

114
6. (AMENDED) The information processing method as claimed in claim 5, wherein in accordance with each of a case where the processing of said analyzing step determines that analog recording is released by paying an additional fee, a case where the processing of said analyzing step determines that analog recording is allowed, but digital recording is not allowed and a case where the processing of said analyzing step determines that neither analog recording nor digital recording is allowed, said display control step controls the display on the screen to make the user recognize the respective cases.

7. (AMENDED) The information processing device as claimed in claim 5, wherein said display control step controls the display so that a message of the processing result is displayed on the screen.

8. (AMENDED) The information processing device as claimed in claim 5, wherein said display control step controls the display so that the processing result is displayed on the screen for a predetermined time.

115
10. (AMENDED) The recording medium as claimed in claim 9, wherein in accordance with each of a case where the processing of said analyzing step determines that analog recording is released by paying an additional fee, a case where the processing of said analyzing step determines that analog recording is allowed, but digital recording is not allowed and a case where the processing of said analyzing step determines that neither analog recording nor digital recording is allowed, said display control step controls the display on the screen to make the user recognize the respective cases.

cont

11. (AMENDED) The recording medium as claimed in claim 9, wherein said display control step controls the display so that a message of the processing result is displayed on the screen.

12. (AMENDED) The recording medium as claimed in claim 9, wherein said display control step controls the display so that the processing result is displayed on the screen for a predetermined time.

Insert new claims 13 - 75, as follows:

14 13. (NEW) A system for providing a person seeking to use or view a program copy protect information regarding the program, said system comprising:

a display;

a processor adapted to execute instructions, said instructions including instructions for causing said processor to perform the steps of identifying the presence of copy protect data within said program, analyzing said copy protect data to determine the type of said copy protect data and controlling said display to display information regarding said copy protect data on said display for viewing by said person.

14. (NEW) A system as in claim 13, wherein said system further comprises a receiver adapted to receive a broadcast of said program.

15. (NEW) A system as in claim 14, wherein said receiver comprises a set top box.

16. (NEW) A system as in claim 14, wherein said receiver comprises an integrated receiver decoder.

17. (NEW) A system as in claim 14, further comprising a television and wherein said television comprises said receiver and said display.

18. (NEW) A system as in claim 13, wherein said display is adapted to display said program and said instructions further comprise instructions for causing said processor to perform said identifying, said analyzing and said controlling steps before said display of said program.

19. (NEW) A system as in claim 18, wherein said program requires paying money for said display of said program.

20. (NEW) A system as in claim 13, wherein said system further comprises a recorder adapted for copying said program and said instructions further comprise instructions for causing said processor to perform said identifying, said analyzing and said controlling steps before said copying of said program.

21. (NEW) A system as in claim 20, wherein said program requires paying money for said copying of said program.

22. (NEW) A system as in claim 13, wherein said instructions further comprise instructions for causing said processor to perform the step of controlling said display to display a menu containing interactive prompts for receiving said person's input.

23. (NEW) A system as in claim 22, wherein said prompts include a prompt for said person to acknowledge the presence of said copy protect data within said program.

24. (NEW) A system as in claim 22, wherein said prompts include a prompt for said person to cancel a viewing of said program.

25. (NEW) A system as in claim 22, wherein said prompts include a prompt for said person to pay for a viewing of said program.

26. (NEW) A system as in claim 22, wherein said prompts include a prompt for said person to pay for a recording of said program.

27. (NEW) A system as in claim 22, wherein said prompts include a prompt for said person to cancel the display of said information.

28. (NEW) A system as in claim 13, wherein said copy protect data comprises data preventing digital copying of said program.

29. (NEW) A system as in claim 13, wherein said copy protect data comprises data preventing analog copying of said program.

30. (NEW) A system as in claim 13, wherein said copy protect data comprises data preventing both analog copying and digital copying of said program.

31. (NEW) A system as in claim 13, wherein said instructions further comprise instructions for causing said processor to perform the step of controlling said display to terminate the display of said information upon expiration of a predetermined time period.

32. (NEW) A system as in claim 13, wherein said instructions further comprise instructions for causing said processor to perform the step of controlling said display to display the type of said copy protect data.

33. (NEW) A system as in claim 13, wherein said program is a digital program.

34. (NEW) A method for providing a person seeking to use or view a program copy protect information regarding the program, said method comprising:

identifying the presence of copy protect data within said program;

analyzing said copy protect data to determine the type of said copy protect data; and

controlling a display to display information regarding said copy protect data on said display for viewing by said person.

35. (NEW) A method as in claim 34, further comprising broadcasting said program to a receiver.

36. (NEW) A method as in claim 35, wherein said receiver comprises a set top box.

37. (NEW) A method as in claim 35, wherein said receiver comprises an integrated receiver decoder.

38. (NEW) A method as in claim 35, further comprising broadcasting said program to a television and wherein said television comprises said receiver and display.

39. (NEW) A method as in claim 34, further comprising displaying said program and wherein said identifying, said analyzing and said controlling occur before said displaying of said program.

40. (NEW) A method as in claim 39, further comprising paying money for said displaying of said program.

41. (NEW) A method as in claim 34, further comprising recording said program and wherein said identifying, said analyzing and said controlling occur before said recording of said program.

42. (NEW) A method as in claim 41, further comprising paying money for said recording of said program.

43. (NEW) A method as in claim 34, further comprising controlling said display to display a menu containing interactive prompts for receiving said person's input.

44. (NEW) A method as in claim 43, wherein said prompts include a prompt for said person to acknowledge the presence of said copy protect data.

45. (NEW) A method as in claim 43, wherein said prompts include a prompt for said person to cancel a viewing of said program.

46. (NEW) A method as in claim 43, wherein said prompts include a prompt for said person to pay for a viewing of said program.

47. (NEW) A method as in claim 43, wherein said prompts include a prompt for said person to pay for a recording of said program.

48. (NEW) A method as in claim 43, wherein said prompts include a prompt for said person to cancel the display of said information.

49. (NEW) A method as in claim 34, wherein said copy protect data comprises data preventing digital copying of said program.

50. (NEW) A method as in claim 34, wherein said copy protect data comprises data preventing analog copying of said program.

51. (NEW) A method as in claim 34, wherein said copy protect data comprises data preventing both analog copying and digital copying of said program.

52. (NEW) A method as in claim 34, further comprising controlling said display to terminate the display of said information upon expiration of a predetermined time period.

53. (NEW) A method as in claim 34, further comprising controlling said display to display the type of said copy protect data.

54. (NEW) A method as in claim 34, wherein said program is a digital program.

55. (NEW) A computer readable medium having computer executable software code stored on said medium for providing a person seeking to use or view a program copy protect information regarding the program, said code comprising instructions for causing a processor of a system to perform the steps of identifying the presence of copy protect data within said program, analyzing said copy protect data to determine the type of said copy protect data and controlling a display of said system to display information regarding said copy protect data on said display for viewing by said person.

56. (NEW) A computer readable medium as in claim 55, wherein said system comprises a receiver adapted to receive a broadcast of said program.

57. (NEW) A computer readable medium as in claim 56, wherein said receiver comprises a set top box.

58. (NEW) A computer readable medium as in claim 56, wherein said receiver comprises an integrated receiver decoder.

59. (NEW) A computer readable medium as in claim 56, wherein said system further comprises a television and said television comprises said receiver and said display.

60. (NEW) A computer readable medium as in claim 55, wherein said display is adapted to display said program and said instructions further comprise instructions for causing said processor to perform said identifying, said analyzing and said controlling steps before said display of said program.

61. (NEW) A computer readable medium as in claim 60, wherein said program requires paying money for said display of said program.

62. (NEW) A computer readable medium as in claim 55, wherein said system comprises a recorder adapted for copying said program and said instructions further comprise instructions for causing said processor to perform said identifying, said

analyzing and said controlling steps before said copying of said program.

63. (NEW) A computer readable medium as in claim 62, wherein said program requires paying money for said copying of said program.

64. (NEW) A computer readable medium as in claim 55, wherein said instructions further comprise instructions for causing said processor to perform the step of controlling said display to display a menu containing interactive prompts for receiving said person's input.

65. (NEW) A computer readable medium as in claim 64, wherein said prompts include a prompt for said person to acknowledge the presence of said copy protect data within said program.

66. (NEW) A computer readable medium as in claim 64, wherein said prompts include a prompt for said person to cancel a viewing of said program.

67. (NEW) A computer readable medium as in claim 64, wherein said prompts include a prompt for said person to pay for a viewing of said program.

68. (NEW) A computer readable medium as in claim 64, wherein said prompts include a prompt for said person to pay for a recording of said program.

69. (NEW) A computer readable medium as in claim 64, wherein said prompts include a prompt for said person to cancel the display of said information.

70. (NEW) A computer readable medium as in claim 55, wherein said copy protect data comprises data preventing digital copying of said program.

71. (NEW) A computer readable medium as in claim 55, wherein said copy protect data comprises data preventing analog copying of said program.

72. (NEW) A computer readable medium as in claim 55, wherein said copy protect data comprises data preventing both analog copying and digital copying of said program.

73. (NEW) A computer readable medium as in claim 55, wherein said instructions further comprise instructions for causing said processor to perform the step of controlling said display to terminate the display of said information upon expiration of a predetermined time period.

74. (NEW) A computer readable medium as in claim 55, wherein said instructions further comprise instructions for causing said processor to perform the step of controlling said display to display the type of said copy protect data.

75. (NEW) A computer readable medium as in claim 55, wherein said program is a digital program.
